Chew Magna, Bristol BS40 8PP  
Tel: 01275 332420**

# CHEWS2TRAVEL

At Chew Medical Practice we are committed to providing high standards of care. We are delighted to be able to extend our care in travel health by running a designated travel clinic Chews2Travel.

The clinic which is open on a Saturday morning is open to the general public, this means that you do not have to be registered at the surgery.

Travel abroad continues to be popular due to a number of reasons. Travelling is common for business purposes as well as travelling to visit friends or relatives and just simply for pleasure. It is estimated that 50% of British travellers do not seek adequate travel advice, take out necessary travel insurance or research the area they are visiting.

Travellers attending the clinic will have an individual travel health consultation which will focus on numerous travel aspects to help the traveller to gain greater understanding of the importance of safe travel to their chosen destination. We will not carry out vaccinations without a full individual risk assessment first, which will be based on information provided by yourself concerning the destination and activities to be undertaken, including previous and existing health history.

The travel clinic is a member of the **British Travel health association** and is run by trained nurses who have a keen interest in travel and have attended numerous training sessions concerning travel health. The nurses work to update any relevant clinical protocols concerning all areas of travel assessment and needs. They have access to up-to-date travel information via database systems. They are competent and experienced at undertaking travel risk assessments and consultations.

*Our practice team has a keen interest in travel health and as experienced travellers are pleased to offer this service*
